Dear Josh;

I have your letter of the 7th. I'm not sure that I understand most of it. The thing I do understand, however, is that you want some un-depolymerized DRNA. I'm preparing a fresh sample for you from chick embryos, and I shall send it along to you in a day or two. By the way, if you do not expend all the desoxyribonuclease save some for me; I should like to compare it with some I have prepared.

Regards to you and your wife from Ada and myself,

Sincerely,
